## Who It Is For

---

-  Tracking stress and sleep patterns
-  Using GPS for outdoor activities
-  Accessing Premium health insights
-  Wanting 24/7 heart rate monitoring

## Who It Is Not For

---

-  Users under 22 for ECG features
-  Those without Fitbit Premium
-  Residents of unsupported countries
-  Medical professionals for diagnostics

## Trade Offs to Consider

---

-  GPS battery drain vs. regular use
-  Premium subscription cost
-  Limited Alexa language support
-  Medical features not for diagnosis

## How It Compares

---

- More health metrics than basic models
- Shorter battery than competitors
- Premium subscription required for full features
- Limited international language support

## Choose This If...

---

- ✓ Need advanced stress/sleep tracking
- ✓ Want GPS for workouts
- ✓ Access Premium health analytics
- ✓ Prefer touchscreen interface

## Skip This If...

---

- × Require medical-grade diagnostics
- × Don't want subscription fees
- × Need longer battery life
- × Prefer simpler features
