Who It Is For

- ✓ Users with myopia up to 600
- ✓ Smartphone gamers and movie watchers
- ✓ Those needing adjustable IPD
- ✓ Comfort-focused wearable users
- ✓ Budget-conscious VR seekers
- ✓ Cross-platform content consumers

Who It Is Not For

- ✗ People with myopia over 600
- ✗ Users requiring prescription lenses
- ✗ Owners of phones outside 4.7-6.0 inch range
- ✗ Those prioritizing ultra-lightweight design
- ✗ Professional VR content creators

Trade Offs to Consider

- Limited 100° field of view compared to premium headsets
- No built-in prescription lens support
- Potential discomfort during prolonged use
- Lens clarity may degrade with extended use
- Heavier than some competitive models

Users Say

● POSITIVES

- ✓ Adjustable IPD makes it comfortable for different users
 - ✓ Immersive sound enhances gaming experience
 - ✓ Soft PU mask feels breathable during use
-

● COMPLAINTS

- ⚠ Viewing angle feels narrower than expected
- ⚠ Lens clarity diminishes after extended use
- ⚠ Headband pressure points develop after 30 minutes

How It Compares

- Smaller field of view than premium VR headsets
- No built-in lens correction for severe myopia
- Less durable materials compared to enterprise models
- Fewer customization options for eye alignment

Choose This If...

- ✓ Need adjustable IPD for different users
- ✓ Want immersive smartphone VR experiences
- ✓ Prioritize comfort over premium features
- ✓ Looking for budget-friendly VR solution

Skip This If...

- ✗ Have myopia over 600 degrees
- ✗ Require prescription lens compatibility
- ✗ Need ultra-lightweight design
- ✗ Seek professional-grade VR performance
