#### DESIGN

**Lightweight rectangular frame with polarized lenses**

## Who It Is For

---

-  People traveling internationally for real-time translation
-  Users needing hands-free phone calls and music playback
-  Individuals seeking UV and blue light eye protection
-  Travelers looking for lightweight, sweatproof eyewear

## Who It Is Not For

---

-  Users who prefer traditional sunglasses without smart features
-  People needing a built-in camera for video calls
-  Those who want GPS navigation or app-based controls
-  Individuals with specific prescription lens requirements

## Trade Offs to Consider

---

-  No camera for video calls or photos
-  Limited battery life for extended use
-  Requires charging both sides for full power
-  No GPS functionality for location tracking

## Users Say

---

### ● POSITIVES

- ✓ Great for breaking language barriers during travel
- ✓ Comfortable to wear all day without pressure
- ✓ Easy to use for hands-free calls and music

---

### ● COMPLAINTS

- ⚠ Charging both sides can be time-consuming
- ⚠ No camera for video or photo features
- ⚠ Limited battery life for heavy use

## How It Compares

---

- Better than traditional sunglasses with translation features
- Less than premium smart glasses with full app integration
- More convenient than phone-based translation apps
- Not as durable as waterproof smart glasses with GPS

## Choose This If...

---

- ✓ You need real-time translation for travel
- ✓ You want hands-free phone calls and music
- ✓ You need UV and blue light eye protection
- ✓ You prefer lightweight, sweatproof eyewear

## ✗ Skip This If...

---

- ✗ You require a built-in camera for video calls
- ✗ You need GPS navigation or app-based controls
- ✗ You want long battery life for extended use
- ✗ You need prescription lenses or specific frame styles
