## Who It Is For

---

-  Players needing adjustable lenses for vision correction
-  Users wanting 360-degree immersive gameplay
-  Switch owners seeking VR game compatibility
-  Those prioritizing comfort over premium features
-  Budget-conscious VR hobbyists
-  Parents looking for safe home VR solutions

## Who It Is Not For

---

-  Users requiring high-end PC VR systems
-  People with fixed IPD preferences
-  Non-owners of Nintendo Switch consoles
-  Those needing lightweight portable VR
-  Professionals requiring advanced tracking tech
-  Gamers prioritizing 4K resolution

## Trade Offs to Consider

---

-  Limited to Switch and smartphone compatibility
-  Basic comfort features vs premium headsets
-  No motion tracking or 3D audio support
-  Potential distortion with improper IPD settings
-  Requires additional accessories for full functionality
-  Limited game library compared to dedicated VR

## How It Compares

---

- Switch VR compatibility vs PC VR systems
- Adjustable IPD vs fixed lens designs
- Home VR use vs dedicated VR setups
- Basic comfort vs premium ergonomic features
- Limited game support vs broad VR library
- Budget-friendly vs high-end VR headsets

## Choose This If...

---

- ✓ Need Switch VR game compatibility
- ✓ Prioritize adjustable comfort features
- ✓ Seek home VR solutions without theaters
- ✓ Want budget-friendly VR options
- ✓ Need IPD customization for vision

## Skip This If...

---

- ✗ Require high-end VR systems
- ✗ Prefer fixed IPD designs
- ✗ Need advanced motion tracking
- ✗ Prioritize 4K resolution
- ✗ Want professional-grade VR gear
