## Who It Is For

---

-  Users needing basic health monitoring
-  People who want call notifications
-  Fitness trackers for daily activity
-  Those requiring waterproof durability
-  Smartwatch users for iOS/Android
-  Individuals needing step and sleep tracking

## Who It Is Not For

---

-  Users needing GPS navigation
-  People wanting 10+ day battery life
-  Those requiring advanced health metrics
-  Users needing long-term battery
-  Individuals needing military-grade waterproofing
-  People prioritizing app-based controls

## Trade Offs to Consider

---

-  No built-in GPS functionality
-  Limited battery life compared to premium models
-  Basic health metrics without advanced analytics
-  No customizable watch faces beyond 100+ options
-  Dependent on smartphone for full features
-  No voice assistant integration

## How It Compares

---

- Compared to GPS-enabled fitness trackers
- Versus smartwatches with 10+ day battery
- Similar to basic health monitors
- Less advanced than premium models
- Better than standard pedometers
- Equivalent to mid-range smartwatches

## Choose This If...

---

- ✓ Need basic health tracking features
- ✓ Want call notifications without phone
- ✓ Require waterproof durability
- ✓ Looking for affordable fitness tracker
- ✓ Need iOS/Android compatibility
- ✓ Desire customizable watch faces

## Skip This If...

---

- ✗ Require GPS navigation
- ✗ Need 10+ day battery life
- ✗ Want advanced health analytics
- ✗ Prioritize long-term battery
- ✗ Need military-grade waterproofing
- ✗ Desire voice assistant integration
