## Who It Is For

---

- ✓ Adults wanting affordable 3D movie experiences
- ✓ Gamers using smartphones for VR content
- ✓ Educators demonstrating 360-degree visuals
- ✓ Home users exploring virtual reality

## Who It Is Not For

---

- ✗ Children under 13 years old
- ✗ Users requiring 4K resolution displays
- ✗ Those needing motion tracking capabilities
- ✗ People with Bluetooth connectivity issues

## Trade Offs to Consider

---

- Limited field of view compared to high-end headsets
- Requires smartphone for full functionality
- No built-in speakers for audio
- Setup needs phone app installation

## Users Say

### ● POSITIVES

- ✓ Comfortable for extended movie watching
- ✓ Easy setup for beginners
- ✓ Good value for basic VR experiences

### ● COMPLAINTS

- ⚠ Audio quality could be better
- ⚠ Limited app selection for games
- ⚠ Straps may slip during intense use

## How It Compares

- Less immersive than dedicated VR headsets
- No motion tracking features
- Requires separate phone for operation
- Lower resolution than premium models

## Choose This If...

- ✓ Looking for affordable 3D entertainment
- ✓ Want simple VR experiences on smartphones
- ✓ Need lightweight portable headset
- ✓ Seek basic immersive visuals for home use

## Skip This If...

- ✗ Require high-resolution 4K displays
- ✗ Need advanced motion tracking features
- ✗ Preferring wired audio connections
- ✗ Looking for premium VR gaming experiences
